ABOUT LAMPE BERGER

L'ORIGINAL DEPUIS 1898

From the start, the vocation of Lampe Berger Paris has always been to take care of indoor air quality.

Invented way back in 1898, Lampe Berger's system of diffusion by catalysis still has no rival today for purifying the air in your home by truly destroying unpleasant smells, while at the same time diffusing delicate indoor fragrances.

Because of the attention it pays to quality in all its aspects, Lampe Berger makes it a rule to diffuse only perfectly mastered and controlled substances into the air.

In order to appeal to everybody's tastes, the Lampe Berger collection now contains over a hundred different lamp models and some fifty Parfums de Maison.
